Performance	1.31%	16.49%	10.24%

#### Returns and Benchmark

## Portfolio Composition

# Evolution of the Value of Participating Units (AOA)

The reported returns represent past data and do not constitute a guarantee of future returns. The disclosed returns would only be obtained if the investment were made and maintained throughout the reference period. For the purpose of calculating returns, subscription, redemption and transfer fees are not taken into account, when applicable, being net of all other fees and charges. The Synthetic Risk and Reward Indicator measures the risk of price variation of the Fund's units, based on the volatility verified in the last 5 years and classifies the Fund's risk level between 1 (minimum risk) and 6 (maximum risk). Lower risk potentially implies lower reward and higher risk potentially implies higher reward. Investment in funds may imply the loss of invested capital if the fund does not have guaranteed capital. Benchmark-the criteria used are the average rate for Time Deposits of up to 90 days and between 90 and 181 days (Effective rate, net of taxes – IAC), available for consultation at the National Bank of Angola. The TxR YTD (Year to Date) is the rate of return (annualized) calculated from the first day of the annual calendar to the moment to which it refers; the TxR 12M is the rate of return for the last 12 months of the Fund (tax free, as defined in the Fiscal Regime of UCIs). This information does not exempt you from reading the simplified and complete Prospectus, available at www.hermeracapitalpartners.com, and on the respective distributor websites (Banco Millennium Atlântico), before making an investment decision.
