

Macroeconomic Context

In February 2025, Angola produced an average daily output of 1.054 million barrels of oil (BOPD), totaling 29.5 million barrels for the month. Production registered a 9.4% decline compared to January, while Brent crude oil prices remained stable at around \$78.40, influenced by geopolitical tensions and OPEC+'s global supply adjustments.

Inflation

In February, annual inflation slowed to 25.26%. The BNA (National Bank of Angola) kept interest rates at 19.5%, aiming to reduce inflation to 17.5% by the end of 2025. Despite the downward trend, purchasing power remains under pressure, with accumulated wage losses of 22% in 2024.

Politics and Money Market

The BNA kept rates unchanged in February, maintaining the key rate at 19.5%, the liquidity provision rate at 20.5%, and the absorption rate at 18.5%. This strategic decision aims to balance inflation control with economic stimulus while preserving credit access.

Capital Market

During February 2025, the Angolan Debt and Stock Exchange (BODIVA) recorded trading volumes surpassing 205 billion kwanzas. Sovereign debt instruments showed stable returns, with Treasury Bills holding at 16% and 4-year Treasury Bonds achieving a 16.75% yield.

Foreign Exchange Market

In February, the Kwanza remained stable at 918.70 AOA/USD and an estimated 992.20 AOA/EUR, reflecting moderating inflation (25.26%) and consistent BNA monetary policy (19.50% base rate).

Investment objective

The Fund will seek to provide its participants with an investment with low volatility and a level of stable potential return above the alternatives offered by traditional banking applications, through investment mainly made in money market securities and time deposits with a residual maturity of less than 12 months

Risk

Synthetic Risk and Remuneration Indicator

Investor Profile

Being of low risk, the Fund is suitable for clients with a conservative risk profile who are looking for a return superior to that of the traditional term deposit, and with greater flexibility in the mobilization of resources, since it is an open fund with the structure of assets of a highly liquid Fund.

Fund Features

Fund Class: Short Term

Fund Type: Open-Ended

Start of Activity: Jun-16

Assets under Management (28/02/2025):
AOA 18 535 846 Million

Currency: Kwanza (AOA)

Redemption Notice: Available on the 5th business day after ordering

Monthly Fund Performance

During the month of January, Liquidez Prime Fund maintained its diversification strategy across different types of financial savings instruments, thus bringing an annualized profitability rate for the month of 0,75% and 10,24%. The Fund's behavior was driven by portfolio movements and direct impacts on the appreciation of the Fund's portfolio assets.

	February (effective)	February (annualized)	February (Year To Date)
Performance	0,75%	10,24%	12,80%

Returns and Benchmark

Portfolio Composition

Evolution of the Value of Participating Units (AOA)

The reported returns represent past data and do not constitute a guarantee of future returns. The disclosed returns would only be obtained if the investment were made and maintained throughout the reference period. For the purpose of calculating returns, subscription, redemption and transfer fees are not taken into account, when applicable, being net of all other fees and charges. The Synthetic Risk and Reward Indicator measures the risk of price variation of the Fund's units, based on the volatility verified in the last 5 years and classifies the Fund's risk level between 1 (minimum risk) and 6 (maximum risk). Lower risk potentially implies lower reward and higher risk potentially implies higher reward. Investment in funds may imply the loss of invested capital if the fund does not have guaranteed capital. Benchmark – the criteria used are the average rate for Time Deposits of up to 90 days (Effective rate, net of taxes – IAC), available for consultation at the National Bank of Angola. The TxR YTD (Year to Date) is the rate of return (annualized) calculated from the first day of the annual calendar to the moment to which it refers; the TxR 12M is the rate of return for the last 12 months of the Fund (tax free, as defined in the Fiscal Regime of UCIs). This information does not exempt you from reading the simplified and complete Prospectus, available at www.hemeracapitalpartners.com, and on the respective distributor websites (Banco Millennium Atlântico), before making an investment decision. For any additional information, contact us at the telephone number (+244) 222 711 643, from Monday to Friday from 9:00 am to 6:00 pm. Fund managed by SG Hemera Capital Partners – SGOIC, S.A., registered with the CMC as a Management Company of Collective Investment Organisms authorized under No. 002/SGOIC/CMC/07-2019.
